2022 CA Internet Safety Priorities

In 2022, there is tremendous energy in CA around making the internet safer and healthier for kids. This energy creates calls for more access, better content, and better protections for our kids. Common Sense is sponsoring and cosponsoring a bipartisan legislative package addressing a wide range of issues including platform accountability, digital citizenship, and social media design.

**AB 2273 (Wicks) The Children's Code** - Requires digital media targeted at children to be appropriately and safely designed for their well being.

2022 CA Broadband Equity Priorities

Common Sense is sponsoring and supporting various broadband equity bills addressing barriers to affordability and universal access to internet service. We are a founding member of the CA Alliance for Digital Equity (CADE), a statewide broadband coalition consisting of a diverse group of stakeholders focussed on legislative and budgetary advocacy.

**House Resolution 125 Airwaves for Equity (Reyes)** - Establishes a federal Digital Equity Foundation to maintain funding for telehealth, internet access, & other digital equity efforts.

**AB 2752 (Wood) Broadband Mapping** - Improves our understanding of which communities are connected to high-speed broadband service at the address level.

**AB 2750 (Bonta) Digital Equity Plan** - Utilizes federal funding to achieve universal broadband access and digital skills.
