Methodology: This study was conducted for Common Sense by SSRS, an independent research company. Telephone interviews were conducted from June 22 to July 15, 2016, among a nationally representative sample of 869 respondents age 18+ who are the parent or guardian of at least one child age 2-17. Interviews were conducted with 249 respondents on landline phones and 620 respondents on cell phones. The margin of error for total respondents is +/-3.8 percent at the 95 percent confidence level. Design effect is 1.32.
