

Common Sense Media Teens in the AI Era: Pornography and Sexual Content Survey Questionnaire

General Pornography Questions

These first few questions will ask about online pornography (porn), including any videos or photos viewed on websites, social media, or anywhere else on the internet that shows nudity and sexual acts intended to entertain and sexually arouse (e.g. turn on) the viewer. Porn often contains explicit pictures of body parts (such as the genitals) and sexual acts (including oral sex, masturbation, anal sex, etc.). Online porn is viewed on digital devices such as computers, smartphones, and tablets.

When we refer to online porn here, we are not referring to the sharing and re-sharing of self-generated nude photos and videos.

The next set of questions will ask about sexually explicit or sexual content that you believe is AI-generated. This includes what people sometimes call "deepfakes," "AI nudes," "undressing" apps, or other AI-generated sexual content. This can include a range of things:

- Fake nude or pornographic images or videos
- Images showing people in revealing or suggestive clothing (like bikinis, underwear, or tight/see-through clothing)

This includes content of real people, made-up people, celebrities, characters, or people you know, whether or not they're actually nude.

Please remember that your answers are anonymous and confidential, and that you may exit the survey at any time if you don't feel comfortable answering these questions.
